

ISTITUTO PASTEUR ITALIA SEMINAR

Venerdì 19 Luglio 2024, ore 15.00

SSAS, Building D, AULA 301 (3 Piano)

Dr. Han-Yu Shih, Ph.D.

(NIH - National Institutes of Health, USA)

"Deciphering Lymphocyte Regulomes in Homeostasis and Diseases"

Dr. Han-Yu Shih's work focuses on understanding the regulatory mechanisms governing lymphocyte functions in both healthy and diseased states. By employing advanced genomic and epigenomic techniques, Dr. Shih deciphers the complex regulomes of lymphocytes, which are crucial for immune responses. This research aims to identify key regulatory elements and pathways that maintain lymphocyte homeostasis and contribute to various diseases, providing insights that could lead to new therapeutic targets for immune-related conditions.
